The ETENA is encouraging you to spread the word about a British journalist seeking to interview families of frontline healthcare workers.

“But why my Mom?": The child’s-eye view of Covid-19

My name’s Joseph Ataman and I’m a British journalist reporting on how Covid-19 has impacted the lives of the children of healthcare workers. I’m working on a long article written **exclusively with the words of children** whose parents are helping fight Covid-19 (as nurses, doctors, cleaners, carers and everything in between). I’m trying to reach any parents who might be willing to let their children participate in this project. I’m trying to capture the issues and feelings that are most important to children themselves at this historic moment.

The project is adhering to strict child-safety guidelines and the first step would be a short phone call to tell you about the project and answer any questions you might have. After that, children can share their perspectives through a letter or drawing, a chat on the phone or a video ‘diary’.

Thank you for considering to take part in this unique project. I’d be very happy to answer any questions you might have, my email is: joseph.ataman@axewoodmedia.com.

You can find one of my previous stories for CNN about children and Covid-19 here:
